Capstone Research Presentation

## About me

I am a dedicated 4th-year Bachelor of Information Technology student at Saint Columban College with a passion for programming and problem-solving. I specialize in web and software development with Java, JavaScript, and database management. My goal is to contribute innovative solutions to challenging projects, leveraging my skills in coding, collaboration, and attention to detail.

## Experience

### Microsoft Specialist

August 2022 - present

RECAL ENTERPRISES

- Utilized advanced knowledge of Microsoft technologies, including Word, PowerPoint, and Excel, to enhance operational efficiency.
- Provided technical support and training to colleagues to optimize software usage.
- Delivered accurate reports and presentations to assist decision-making.

### Assistant Clerk

August 2022 - present

3MRB GENERAL MERCHANDISE OPC

- Organized and maintained administrative records, ensuring data accuracy and compliance.
- Facilitated smooth office operations by supporting team members with daily tasks.
- Streamlined workflows and introduced tools to improve productivity.

### Quality Assurance

Capstone Project

MaCaYa Tech-Trio

- Played a pivotal role in the development and quality assurance of the capstone project, eColumbanoDocz Request.
- Focused on a web-based request management system for school credentials, integrating advanced data visualization techniques.
- Ensured functionality, security, and user-friendliness through rigorous testing and troubleshooting.
